

# OrderStream Portal

Supplier Order Management

[www.vtinfo.com](http://www.vtinfo.com) | [srssales@vtinfo.com](mailto:srssales@vtinfo.com)

## INTRO

OrderStream centralizes your distributor orders, creates forecasts for future demand, and integrates with most ERP systems. Streamline your ordering process, save time, and create a better ordering experience for your distributors by synchronizing purchase orders in the distributor's route accounting system.

## FEATURES

Synchronize purchase orders between you and your distributors on OrderStream. Even customize your ordering constraints by distributor: set minimum pallet configurations, limit seasonal availability, allocate limited products, and more.

**View distributor inventory and projected days on hand**

**Synchronize purchase order changes w/ distributors**

**Manage brand rights and set ordering constraints**

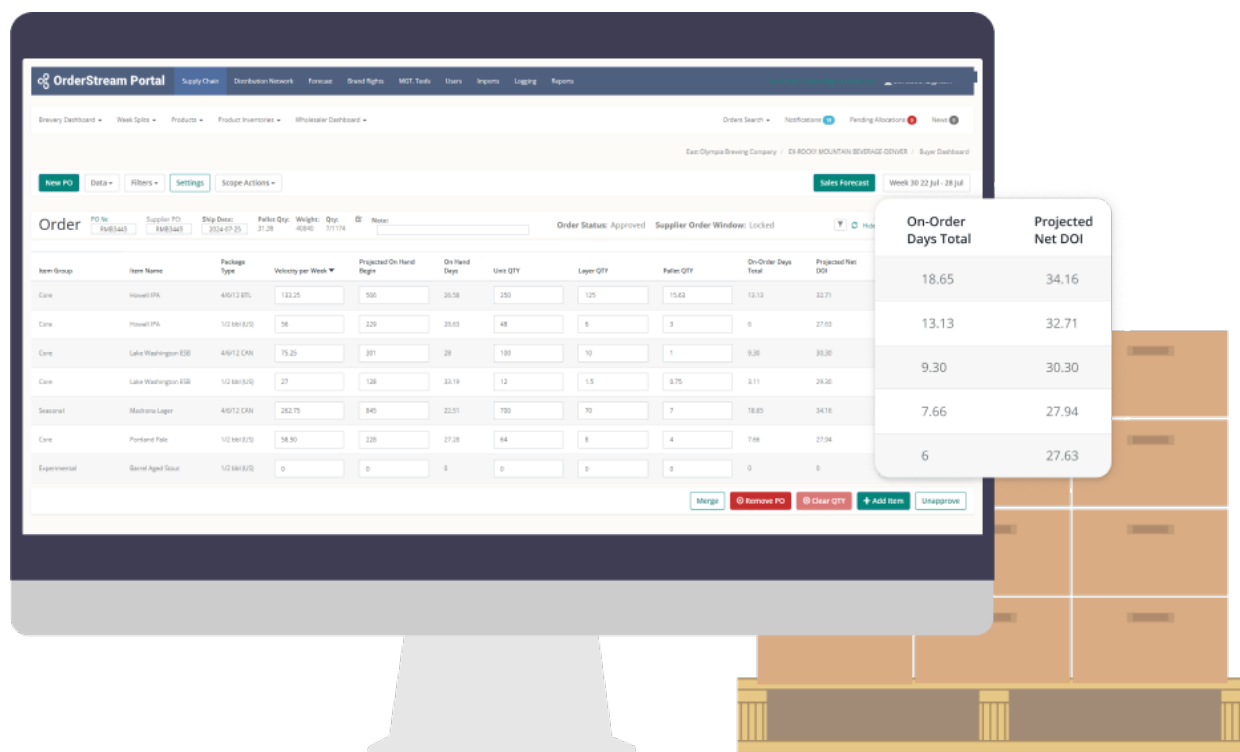

**Flexible forecast based on brand type, market, and season**

**Track internal inventory**

**Integrate SRS sales data**

## ERP INTERGRATIONS ARE AVAILABLE

Connect your ERP for complete production visibility. For a full list of integrations, contact our team.
